

GLOBAL CHALLENGES FOUNDATION – GLOBAL RISKS SURVEY

Methodology: ComRes interviewed 8,101 adults aged between 18 and 64 across: Australia (1,000), Brazil (1,018), China (1,031), Germany (1,001), India (1,013), South Africa (1,038), the UK (1,000) and the USA (1,000). The research was conducted between 27 April and 10 May 2017. The data were weighted to be nationally representative of the population in each of the country by age, gender and region. ComRes is a member of the British Polling Council and abides by its rules.

All press releases or other publications must be checked with ComRes before use. ComRes requires 48 hours to check a press release unless otherwise agreed.

For information about commissioning research please contact simon.carter@comresglobal.com or call +44 (0)20 7871 8660.

To register for Pollwatch, featuring commentary and insight from the ComRes team, please email: pollwatch@comresglobal.com

Q1. How much more secure or insecure would you assess the world to be now compared with two years ago when it comes to global risks? Base: Total	105
Q2. According to the most recent predictions from the United Nations, the worldwide population will increase from 7.5 billion today to 11.2 billion in 2100. Do you believe that the consequences of this population growth for humankind will be: Base: Total	108
Q3_SUM. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? SUMMARY TABLE Base: Total	111
Q3_1. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? Climate change, resulting in environmental damage, such as rising sea levels or melting of icecaps Base: Total	112
Q3_2. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? Other large-scale environmental damage, such as water, air and land pollution Base: Total	115
Q3_3. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? Politically motivated violence and conflict escalating into war Base: Total	118
Q3_4. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? Usage of weapons of mass destruction (nuclear, chemical and biological weapons) Base: Total	121
Q3_5. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? Natural epidemics and pandemics, such as the Zika virus or the Ebola virus Base: Total	124
Q3_6. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? The rise of Artificial Intelligence, that could gain superhuman knowledge and make independent decisions which might become threats to humanity Base: Total	127
Q3_7. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more. How much do you agree or disagree that each of the following could be considered as a global catastrophic risk? Population growth Base: Total	130
Q4_SUM. And how urgently do you think that each of the following need to be responded to? SUMMARY TABLE Base: Total	133
Q4_1. And how urgently do you think that each of the following need to be responded to? Climate change, resulting in environmental damage, such as rising sea levels or melting of icecaps Base: Total	134
Q4_2. And how urgently do you think that each of the following need to be responded to? Other large-scale environmental damage, such as water, air and land pollution Base: Total	139
Q4_3. And how urgently do you think that each of the following need to be responded to? Politically motivated violence and conflict escalating into war Base: Total	144
Q4_4. And how urgently do you think that each of the following need to be responded to? Usage of weapons of mass destruction (nuclear, chemical and biological weapons) Base: Total	149
Q4_5. And how urgently do you think that each of the following need to be responded to? Natural epidemics and pandemics, such as the Zika virus or the Ebola virus Base: Total	154
Q4_6. And how urgently do you think that each of the following need to be responded to? The rise of Artificial Intelligence, that could gain superhuman knowledge and make independent decisions which might become threats to humanity Base: Total	159
Q4_7. And how urgently do you think that each of the following need to be responded to? Population growth Base: Total	164
Q5. Given today's technology, do you believe that the world's natural resources are sufficient to allow all Earth's inhabitants to enjoy the same standard of living as in industrialised countries at present? Base: Total	169
Q6. Do you think we should try to prevent climate catastrophes, which might not occur for several decades or centuries, even if it requires making considerable changes that impact on our current living standards? Base: Total	172

Q3_1. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more.

How much do you agree or disagree that each of the following could be considered as a global catastrophic risk?

Climate change, resulting in environmental damage, such as rising sea levels or melting of icecaps

Q3_3. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more.

How much do you agree or disagree that each of the following could be considered as a global catastrophic risk?

Politically motivated violence and conflict escalating into war

Q3_5. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more.

How much do you agree or disagree that each of the following could be considered as a global catastrophic risk?

Natural epidemics and pandemics, such as the Zika virus or the Ebola virus

Q3_6. Below is a list of some events and threats that have been identified as global catastrophic risks. These are hypothetical future events that have the potential to affect 10% of the global population, or more.

How much do you agree or disagree that each of the following could be considered as a global catastrophic risk?

The rise of Artificial Intelligence, that could gain superhuman knowledge and make independent decisions which might become threats to humanity

Q11. A supranational organisation is an international body comprised of different member countries. It does not replace national governments, but places global interests above that of nation-states. Examples of supranational organisations include the European Union, NATO, and the United Nations.

Do you think that a new supranational organisation should be created to make enforceable global decisions to address global risks?

Q11. A supranational organisation is an international body comprised of different member countries. It does not replace national governments, but places global interests above that of nation-states. Examples of supranational organisations include the European Union, NATO, and the United Nations.

Do you think that a new supranational organisation should be created to make enforceable global decisions to address global risks?

Base: Total

**Q13. Global citizenship is the rights, responsibilities and duties that come with being part of the world. Would you consider yourself a global citizen?
This is in addition to, not instead of, considering yourself as a citizen of your country.**
